COURSE DESCRIPTION

Performing Storage Administrator Tasks with Hitachi Ops Center Suite
1256CI

Who Should Attend

- Storage Administrator

Level

- Professional

Availability

- Customers
- Partners
- Employees

Required Knowledge and Skills

- Hitachi Ops Center suite software
- Basic understanding of block storage
- Volume creation and management
- Backup and replication technologies
- Basic performance terminologies and concepts

Recommended Prep Course(s)

- Managing Hitachi Ops Center Administrator – TSI2929
- Managing Hitachi Ops Center Analyzer – TXI3684
- Managing Data Protection with Hitachi Ops Center Protector – TSI2995

Delivery Type

- Instructor-led
- Virtual Instructor-led

Course Length

- 2 days

Learn how to efficiently and securely manage your organization's storage infrastructure

A Storage Administrator plays a crucial role in managing and maintaining an organization's storage infrastructure, performing daily activities that may vary depending on the size of the organization, the complexity of the storage infrastructure, and specific business requirements. Identifying common tasks and activities of the storage administrators and knowing how to efficiently perform them on a day-to-day basis is essential.

This course provides an overview of Hitachi Ops Center Suite, such as Ops Center Administrator, Analyzer, and Protector, to help the storage administrator complete the activities as follows:

Storage Provisioning

- Allocate storage resources to servers by using Server groups
- Manage storage capacity
- Expand existing volumes

Performance Optimization

- Performance monitoring and analysis in the storage infrastructure

Data Backup and Recovery

- Ensure that regular backups and replication activities are scheduled and completed successfully
- Test and verify data restoration processes to guarantee data recoverability

Additionally, hands-on lab activities enable you to gain practical experience and knowledge about administering and provisioning using Hitachi Ops Center suite products.

Course Objectives

When you complete this course, you should be able to:
- Provide a brief overview of Hitachi Ops Center suite products
- Describe some of the daily tasks performed by the Storage Administrator
- Explain how to use Hitachi Ops Center Administrator for storage provisioning
- Discuss how to use Hitachi Ops Center Analyzer for performance optimization
- Describe how to use Hitachi Ops Center Protector for data backup and recovery

Your roadmap to professional growth starts here!
