- 2 days

Want to learn how to automate and provision storage effortlessly with Ops Center Automator?

Important: You must have completed Working with Hitachi Ops Center – TXI3932 before registering for this course.

This intermediate course provides the necessary tools to automate and simplify the end-to-end storage provisioning process for storage and data center administrators. The course covers the features and key concepts of Hitachi Ops Center Automator including Smart Provisioning. It defines the roles and responsibilities of the storage administrators.

Additionally, hands-on labs provide the opportunity to practice the concepts learned during the course.

Learning Path: Storage Automation and Performance
